## Summary

---

AI/ML engineer who ships fast. Strong product sense and hands-on ability to build RAG and generative systems end-to-end. Comfortable owning full features, running rapid iterations, and delivering high-quality results with minimal supervision.

## Professional Strengths

---

- Ownership-first mindset with ability to take features from idea → implementation → deployment.
- Fast executor capable of delivering high-quality work under tight timelines.
- Highly adaptable to changing priorities, tools, and environments.
- Effortlessly collaborative with cross-functional teams when required.

## Projects (GitHub)

---

### Agentic RAG Chatbot

Python, FAISS, HuggingFace, MCP

- Built an agentic document Q&A system with FAISS + SentenceTransformer enabling semantic search across PDFs, PPTX, DOCX, CSV, and TXT.
- Implemented multi-agent workflows using Model Context Protocol for more accurate, source-cited responses.
- Designed a clean Streamlit UI surfacing citations and evidence chunks for trust and debugging.

### Generative AI Platform (LLMs)

Spring AI, React, Azure

- Developed a unified generative platform including Ask AI, image generation, and recipe modeling.
- Integrated Azure AI endpoints for scalable inference using an API-first architecture.
- Built responsive frontend flows for smooth and interactive generation experiences.

### Plant Disease Classification (CNN)

Python, TensorFlow/Keras, CNN

- Trained a convolutional neural network achieving **95% accuracy** on multi-class leaf disease datasets.
- Performed dataset cleaning, augmentation, and feature extraction to improve generalization.
- Deployed the model with a simple Streamlit web interface enabling instant disease detection from user-uploaded images.

## Skills

---

**ML/AI:** RAG, Embeddings, CNNs, Fine-tuning, Meta Prompts

**Tools:** Python, Pandas, Numpy, SentenceTransformer, FAISS, PyPDF2, python-docx, python-pptx, Vibe-coding tools.

**Operating Tools:** Git, Windows, Linux (Basic)

## Education

---

**B.Tech, Computer Science Engineering**

2022–Present Bennett University — CGPA: 7.7

**Senior Secondary (XII)**

2020–2022 Tirumala Junior College — 96.1%

**Secondary (X)**

2020 Tirumala Educational Institution — GPA: 10

## Certifications

---

DeepLearning.AI — Improving Deep Neural Networks (Hyperparameter Tuning)

DeepLearning.AI + AWS — Generative AI with Large Language Models

DeepLearning.AI — NLP with Classification and Vector Spaces

## Languages

---

English, Telugu, Hindi (basic)
